

One Step

Wound and Infection Treatment

STARTS HEALING IMMEDIATELY

Case Study - Feline Hot Spot

Use to Treat and/or Prevent:

Scratches, Ring Worm, Eye Infections, Skin Rashes, Skin Ulcers, Hot Spots, Cuts, Burns, Post-Surgical Sites and Reduces Chronic Inflammation

(See the reverse side for more information.)

One Step

Wound and Infection Treatment STARTS HEALING IMMEDIATELY

Case Study - Feline Hot Spot

Feline Patient:	Jynx – Feline Hot Spot
Wound/Ailment:	Hot Spot
Affliction Date:	August 13, 2009
Vetericyn Product:	Vetericyn Wound & Infection HydroGel
Treatment Regimen:	For the first couple of days, the gel was applied 3-4 times a day. Starting see positive results within the first 24 hours. Since Vetericyn does not sting, Jynx did not mind having it applied to her wound. Because Vetericyn is safe as water, it was not a big deal if she tried to lick the treated area.
Healing Period:	August 20, 2009 – 7 days

FORMULA BASED ON

FDA Cleared

Microcyn[®] Technology

Safe to use on all animals: Dogs, Horses, Cats and Exotics
