Scratches, Ring Worm, Eye Infections, Skin Rashes, Skin Ulcers, Hot Spots, Cuts, Burns, Post-Surgical Sites and Reduces Chronic Inflammation

(See the reverse side for more information.)

One Step

Wound and Infection Treatment STARTS HEALING IMMEDIATELY

Case Study - Dog with Mange

Rescue- Name:	Kraig Thomas
Training Center:	N/A
Canine Patient:	Chow Dog
Wound/Ailment:	<p>Severe Mange</p> <p>Mange is a parasitic infestation of the skin of animals. Common symptoms include hair loss, itching and inflammation, all of which are caused by microscopic mites. Mange is most commonly found in dogs and other canines, but it can occur in other domestic and wild animals.</p> <p>Typically treated with shampoos and antibiotics, Vetericyn can be added to the treatment regimen of Mange. The Chow Dog had such a severe case of mange that he had open wounds all over his body which caused him to be oozing constantly. When he was brought into Dr. Leonard Sigdestad, the doctor did not believe that hair would grow back and was unsure that the dog would survive. He was treated with Vetericyn and one round of antibiotics.</p> <p>Within 1 day of using Vetericyn, Dr. Sigdestad was extremely impressed with the results. The wound sites were slightly pink (due to an increase of oxygen) and were already healing. The wounds began healing immediately and within 2 weeks the dog began to grow hair again. At 30 days, the dog was healed and grew all of his hair back!</p>
Vetericyn Product:	Vetericyn Wound and Infection Treatment (Spray)
Treatment Regimen:	<p>Vetericyn administered 6 times a day for days 1-14, 4 times a day for days 15-30.</p> <p>1 Round of antibiotic treatment administered.</p>
Healing Period:	30 Days

(See the reverse side for more information.)

FORMULA BASED ON

FDA Cleared

Microcyn[®] Technology

Safe to use on all animals: Dogs, Horses, Cats and Exotics

- In solution kills 99.9999% of bacteria, fungi and viruses on contact
- Non-toxic
- Safe to use around eyes, nose and mouth
- Doesn't harm healthy tissue
- No steroids or antibiotics
- Eliminates wound odors
- Increases oxygen supply to wound
- Reduces chronic inflammation
- Works naturally with your animal's immune system

Use to Treat:

Outbreaks From Pigeon Fever, Scratches, Ring Worm, Rain Rot, Eye Infections, Cinch Fungus, Skin Rashes, Skin Ulcers, Hot Spots, Cuts, Burns, Post-Surgical Sites and Reduces Chronic Inflammation
